

## FISH FLOUR

In our associated plants along the entire COAST of the Peruvian territory, we produce peruvian fishmeal. This hydrobiological industrial product is rich in amino acids and essential fatty acids, promotes the absorption of nutrients, offering high digestibility (min 92%), optimal flow and density.

It is a key ingredient used in feed recipes for fish, shrimp, pigs and poultry, because it optimizes their growth, development and reproduction.

<u>CARACTERÍSTICAS</u>	<u>SUPER PRIME</u>	<u>PRIME</u>
Proteína	68% min	67% min
TVN	100 Mg / 100 máx	120 Mg / 100 máx
Histamina	500 ppm máx	1000 ppm máx
Grasa	10% máx	10% máx
